Election/Restriction

In the Restriction Requirement, the Examiner identifies two allegedly patentably distinct inventions and thus requires election of one of the inventions for prosecution on the merits. Specifically, the Examiner states that that the application contains claims directed to two patentably distinct species. The Examiner identifies Species I as a device comprising a peak angle in a range of 100° to 125°, and the refraction index is in a range from about 1.51 to 1.59. The Examiner identifies Species II as a device comprising a peak angle in a range from about 130° to about 140°, and the refraction index of the prism sheet is in a range from about 1.61 to 1.69. Species I identified by the Examiner is readable on claim 26, while Species II identified by the Examiner is readable on claim 27. However, both claims 26 and 27 have been canceled by amendment rendering the Restriction Requirement moot. Therefore, Applicants rely on the prior election to the Restriction Requirement dated July 14, 2005.
